

## NU Osteopathy Charging Policy

To ensure maximum treatment time we invite our patients to pay for their appointment during the online booking process. If you do not wish to pay for your treatment online we can accept cash or a card on the day.

Appointments can be cancelled or re-scheduled online up to 24 hours before they occur and will incur no charge.

Appointments which are missed or cancelled within 24 hours of their due time will be charged in-full as the appointment space will have been denied to other patients.

### Private Insurance

Please check with your insurer as to whether they cover the full cost of your osteopathic treatment with us.

### How Much Will My Treatment Cost?

We currently charge £45 for each consultation. On your first appointment, if we think we can help you, we will give you an estimate of the number of consultations we think that you might require. This can only ever be an estimate because people all heal at their own particular rate. As a rough guideline, patients typically see us for between 3 and 6 treatments. This obviously depends on the nature of the complaint that has brought you to us. Extreme trauma and long-term conditions will obviously take longer to improve than recent minor injuries.

We do advise patients to have regular maintenance check-ups where we can check your body's function and prevent conditions from causing long-term problems. Depending on your age and state of general health we suggest these are from every 6 to 12 weeks.
